

## Kindergarten Shoe Tying Week

Kindergarten students recently spent some time in Physical Education learning how to tie tennis shoes. Working in a group setting is sometimes the motivation that young children need to master this skill. Accomplishing this task is always a major milestone, so please work with your child and encourage him/her to practice. If your child already learned how to tie in P.E., please ask him/her to show you this new skill. You will be very proud!

Learning to tie shoes is hard work but determination pays off.
